4th Helmholtz-Munich Immunology Symposium on
“Immunometabolism - Impact on Environmental and Metabolic Health”

Wednesday, September 29th 2021

Welcoming note organizing committee: Carolin Daniel / Ali Önder Yildirim

Session I Chair: Isabelle Serr (HMGU)
14:10 - 14:30 Mikael Simons, TUM
How lipid metabolism is connected to innate immune function in remyelination of the CNS

14:30 - 14:50 Caspar Ohnmacht, HMGU
Who controls the T(reg)ulators: Dendritic Cells, Microbiome & beyond

14:50 - 15:10 Gurumoorthy Krishnamoorthy, MPI
Diet-microbiome axis in the regulation of autoimmunity

15:10 - 15:20 Short break

Session II Chair: Isis E. Fernandez Buelvas (HMGU)
15:20 - 15:40 Barbara Schraml, LMU
Dendritic cells in early life – immune sentinels wise beyond their age?

15:40 – 16:00 Alexander Bartelt, HMGU
Adipocyte inflammation in metabolic disorders

16:00 – 16:20 Maria Rohm, HMGU
Novel players in cancer-associated weight loss

16:20 - 17:00 Keynote: Mihai G Netea, NL
Immunometabolic control of trained immunity

17:00 - 17:10 Discussion and Conclusion

Please join the 4th Helmholtz-Munich Immunology Symposium from your computer, tablet or smartphone.
