

Postdoc position in epidemiology for 2 years (full time or part-time)

As German Research Center for Environmental Health, **Helmholtz Zentrum München** pursues the goal of developing personalized medical approaches for the prevention and therapy of major common diseases such as diabetes mellitus and lung diseases. Helmholtz Zentrum München is a member of the Helmholtz Association, Germany's largest scientific organization, and of the partner institutions of the German Center for Diabetes Research (DZD).

The **German Center for Diabetes Research (DZD)** is a national association combining the efforts of leading German academic research institutions and universities. It aims for the development of a new generation of biomedical scientists who translate fundamental scientific discoveries into novel individualized prevention and therapy strategies for type 1 and type 2 diabetes.

Within the Postdoc Program of the DZD the Institute of Epidemiology at the Helmholtz Zentrum München is seeking candidates for a **postdoc position** in the **field of complications development in prediabetes and type 2 diabetes**.

Job Description

- Statistical analyses with the software R and SAS regarding the association of novel risk factors for complications in prediabetes and type 2 diabetes
- Interpretation and presentation of results
- Writing of scientific publications and project reports
- Contribution to field work/data collection/data quality assurance
- Contribution to writing of grant proposals

Your Qualifications

- PhD (Graduation 2015-2017) in epidemiology or a related field with experience in epidemiology
- Experience in analysis of epidemiological studies
- Experience in use of statistical software (especially R and SAS)
- Interest in the topic diabetes and its complications
- Good organizational skills, team player and reliable
- Very good command of English and basic knowledge of German

Our Offer

At the Helmholtz Zentrum München, you can contribute together with leading researchers to the investigation of the development, prevention and treatment of environmental diseases such as diabetes, chronic lung diseases and allergies. In order to further promote your professional development, we offer extensive and targeted research training and career programmes. We support the reconciliation between work and private life with flexible working time models, occupational health management, day care facility for children, a childcare subsidy, Elder Care, as well as other counseling and support services.

Remuneration and benefits are in accordance with the collective agreement for the public service (EG 13 TV EntgO Bund).
